Course Project Proposal

Project Title: Niner Connect

Group Number: 4

Team Members: Shawn Kiruba, Adam Dauda, Nguyen Pham, Ian York, Stephen Zargo

Project Description:

The web application that we propose is a full-stack social media platform specifically designed for students. It aims to simplify the process of sharing class schedules and finding friends with similar. It will tackle the problem of having to take multiple screenshots and sharing to each friend. This application will consist of many functionalities to address this problem. Some functionalities include a basic social media feed wall for viewers to find their friends' schedules, the ability to post text or pictures onto the feed wall, the ability to like and unlike posts, the ability to upload schedule information that includes the details and times of class meetings, the ability to view individual classes within a schedule, and finally once uploading a user's entire schedule, the user will be able to see if there are any "friends" that have similar classes. The main target of this application would be students while our representative stakeholders are Dr. Dorodchi and Sandra Wiktor.
